

# The Foundation of InterWeave Architects

---

## *Your Goals, Our Mission.*

This statement directs our efforts and service for each of our clients and projects.

We believe that how we do our work is as important as the work itself. That is why we make sure our mission statement and guiding principles are widely known and strictly upheld.

## Mission Statement

---

InterWeave Architects is a Professional Services Firm, specializing in architecture, design, and consulting. Our mission is to discover and then realize the visions and goals of our clients. In doing so, we strive to make your life easier, and better.

We do this one person, one family, one neighborhood, or one corporation at a time, whether the project is a backyard fence, a new world headquarters complex, or a Property Condition Assessment report. We do it by forming partnerships with all those involved in realizing our clients' visions and goals and working together as a team.

We believe our efforts and collaborations together enrich each other and our communities.

## Guiding Principles

---

### **Integrity**

We base our practice on following through on what we say we will do, on telling the truth, and on being reliable.

### **Collaboration**

We are part of a complex network involved in the realization of our client's vision. We value and appreciate the skills and efforts of all those involved and rely on and incorporate them throughout the process.

### **Discovery**

We make no assumptions about our clients or their visions. We believe in conversation, questions, and observation to learn all we can about our clients and their projects. Through this process, we discover what aspects of the project will determine its ultimate success and keep those elements at the forefront of our efforts.

### **Strong Relationships**

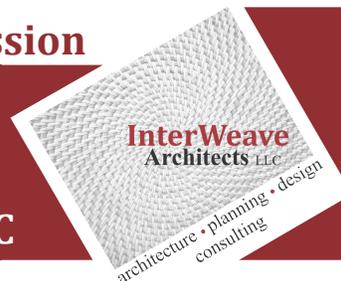

We build mutually rewarding, long-term relationships with our clients, our consultants, contractors, and all those who become part of the team. We do this by demonstrating respect and trust, and expecting it from everyone.

### **Excellence**

We believe in maintaining the highest level of quality in our designs, our deliverables, the information we provide and discover, and the opinions we deliver. We will never compromise on our commitment to excellence.
